Realistic horror game with story and action

Goal + Description How would you describe this game to a friend?

A survival and horror PC game as you try to stop a vengeful, cursed spirit. To destroy the spirit, you must collect remnants of its past life, all while avoiding its relentless attacks. Game offers a chilling experience that keeps you on edge with its dark atmosphere and tension.

Theme + Mood Where are we? (world, events, characters...)

A game set in the real world and in the present day. Events change depending on the areas visited to find the pieces of the evil spirit, a dark forest and an abandoned house could be among these. Characters are the evil spirit seeking revenge, the people haunted by the spirit and the main player, the spirit hunter.

Core mechanics What 'rules' are most important for this game? (movement, health, exp...)

The player moves with WASD and mouse in an open and wide world and must survive to collect the evil spirit's items and bones scattered throughout the game world and burn them in the ceremonial area. While doing this, you must also escape the evil spirit's attacks.

Progression + Flow How does this game engage the player? (levels, history, new content...)

The level logic in the game is regions, it gets scarier and harder to play. As you collect the items belonging to the evil spirit, the evil spirit begins to understand what it is after and its attacks increase. As you collect these items, you begin to understand what happened to the evil spirit and its story. A few independent game sections related to the same subject can also be added.

Aesthetic How does this game look-and-feel like? (graphics, 2D/3D, music, sound, enviroment...)

The game features dark, atmospheric 3D graphics with eerie lighting and shadowy environments. A chilling, ambient soundtrack combined with unsettling sound effects amplifies the suspense.

Controls How does the player interact with the game? (sketch)

Game starts with a classic menu and player enter the game with the latest checkpoint. Player controlled by WASD buttons and rotate face with mouse. Items can be collected with the clicking on it.
